Product Description

Our PowerFlex® 700S AC Drives offer optimized integration for the most demanding stand-alone, coordinated drive control and drive system applications. The PowerFlex 700S AC drive with the DriveLogix™ option combines the powerful performance and flexible control of PowerFlex AC drives with a high-performance Logix engine to produce a highly functional, cost-effective drive and control solution.

V/Hz control, Vector Control with FORCE™ Technology, and Permanent Magnet Motor Control Zero Stacking™ Drives or side-by-side mounting conserves panel space and reduces installation costs Pull-apart control terminal blocks allow for easy wiring and quick disconnect;

Optimized global voltage settings allow quick setup anywhere in the world;

Common bus capability;

SynchLink™ fiber optic link for a high level of drive coordination and data transfer;

AC or DC common bus configurations for stand-alone or multiple drive solutions;

User function library provides logic functions without a PLC;

Optional DriveLogix™ embedded control for application programmability and control of auxiliary functions;

Configuration and programming via optional integral LCD keypad, remote keypad, or software Premier Integration with PowerFlex® AC drives uses the Logix control platform to simplify parameter and tag programming and reduces development time.
