## Product Description

### Product Description

Honeywell MC-FAN511 51303940-250 Cabinet Fan Board

### Technical Application

The Advanced Process Manager (APM) is Honeywell's premier TDC 3000X data acquisition and control device for industrial process applications.

Like the Process Manager™(PM), the Advanced Process Manager's new-technology platform offers a range of capabilities that best meet today's

and tomorrow's process requirements. The APM offers highly flexible I/O functions for both data monitoring and control.

Powerful control functions, including regulatory, logic, and sequencing control are provided for continuous, batch, or hybrid applications. An optimal toolbox of functions that can be configured and programmed meets the needs of data acquisition and advanced control requirements in a highly secure and performanceintensive manner. Of course, APM's capabilities include peer-to-peer communications and compatibility with industry standard communications protocols.
