Product Description

FOXBORO P0928JH DCS FLAT PANEL LCD MONITOR MODULE

The USB annunciator keyboard is an array of 48 LED/switch pairs. It has five rows of 12 keys (which includes a row of 12 macro keys at the top). Its keys have LEDs next to them, except the 12 macro keys. As well, each keyboard has a Silence Horn key and a Lamp Test key. These two illuminated buttons are on the far left, with the Lamp Test key over the Silence Horn key. This keyboard is supported on stations with Windows 10 or Windows Server 2016 operating systems.Each LED, under control of the workstation processor's software, can be ON, OFF, or
FLASHING as determined by the process conditions. These LEDs, when used in conjunction with the unit's audible annunciator, form an effective means of calling a user's attention to specific areas of the system. The switch associated with each LED can be used to call any preconfigured displays or operator responses.Labels for each key, which might contain the LED/switch names, are inserted in a recess under the clear plastic shield inset into each key.

Technical Application
